Shadab Hasnain Khan

Hayward, CA 94545 | 510 938 0120 | shadabhasnainkhan@gmail.com |linkedin.com/shadabhasnainkhan

Summary

Full-stack developer with a CS degree from Cal State East Bay and hands-on experience building secure, deployed web applications using the MERN stack. CompTIA Security+ certified with a strong foundation in secure coding practices. Seeking an entry-level software engineering role where I can contribute immediately and grow.

Projects

Salah Times Web App | Github Link | Website Link

- Built a progressive web app (PWA) that fetches and displays the five daily Islamic prayer times based on the user's live GPS coordinates, consuming the Aladhan REST API and rendering results dynamically in React.
- Implemented geolocation-based API calls, 12-hour time formatting, and automatic highlighting of the current active prayer period by comparing prayer times against the live system clock.
- Displays both Gregorian and Hijri calendar dates, with a clean, mobile-first dark UI optimized for quick at-a-glance use.
- Configured a service worker for offline caching and added a web app manifest, enabling full PWA installability on iOS and Android.

Task Manager Web App | Github Link

- Designed and built a full-stack task management application with JWT-based authentication and bcrypt password hashing, implementing a RESTful API for task CRUD operations.
- Optimized MongoDB schemas with indexing and efficient query design, achieving sub-200ms API response times under load testing.
- Deployed frontend on Vercel and backend on Render with environment-based configuration for production security.

Online Multiplayer BlackJack Application | Github Link

- Collaborated with a team of four to design and build a real-time multiplayer blackjack game in Java using TCP/IP networking, supporting concurrent players over a local server.
- Authored requirements and use case specification documents; designed system architecture with UML diagrams.
- Implemented secure game logic following OWASP principles; validated with JUnit unit and integration testing across 1,000+ simulated game rounds.

Skills

- **Languages:** JavaScript, Java, C++, Python
- **Web:** React, Node.js, Express, MongoDB, HTML, CSS, REST APIs
- **Tools & practices:** Git, Agile, SDLC, JUnit, UML, JWT, bcrypt, Service Workers
- **Certifications:** CompTIA Security+ — secure coding, code reviews, SDLC risk mitigation

Education

Bachelors of Computer Science

California State University - East Bay - Hayward, CA

- 3.5 GPA
- Cum Laude Graduate
- Relevant Coursework: Security and Info Assurance, Software Engineering & Data Structures and Algorithms
